This Catalogue may be shown at BPE or PAGB affiliated clubs.

Class conditions. Please read carefully

- **Nature**
(Combined FIAP, PSA, PAGB and RPS Nature Photography Definition 2018):

Nature photography is restricted to the use of the photographic process to depict all branches of natural history, except anthropology and archaeology, in such a fashion that a well-informed person will be able to identify the subject material and certify its honest presentation.

The story-telling value of a Nature photograph must be weighed more than the pictorial quality while maintaining high technical quality. Scientific bands, scientific tags or radio collars on wild animals are permissible. Photographs of human-created hybrid plants, cultivated plants, feral animals, domestic animals, or mounted specimens are ineligible, as is any form of manipulation that alters the truth of the photographic statement. Processing of the captured

image, by cropping, exposure adjustment, colour correction, noise minimisation, dodging/burning, HDR, focus stacking and sharpening, is allowed. Cloning of image defects and minor distractions, including overlapping elements, are permitted when these do not distort the truth of the photographic statement. Stitched images are not permitted. Images entered as Nature can have landscape, geologic formations, weather phenomena, and extant organisms as the primary subject matter. This includes images taken with the subjects in controlled conditions, such as zoos, game farms, botanical gardens, aquariums and any enclosure where the subjects are totally dependent on man for food. Access to biological subjects may be restricted. By entering a PAGB event, Photographers warrant that they have followed relevant code of practice and hold any necessary licences.

Wildlife Images may be entered in this section. Wildlife images are further defined as one or more extant zoological or botanical organisms free and unrestrained in a natural or adopted habitat. Wildlife is not limited to animals, birds and insects. Marine subjects and botanical subjects (including fungi and algae) taken in the wild are suitable wildlife subjects, as are carcasses of extant species.

Guidance Notes:

Note that images already meeting the separate FIAP Definition of Nature will satisfy this less restrictive definition.

Artistic Nature, meaning photographs which started as Nature, but which have been creatively modified to show a purely pictorial image, do not meet the Nature definition. They may be entered in "Open" events and categories, and do not count towards any Nature quota restriction.

It is not feasible to investigate adherence to the Nature definition when receiving multiple entries at an Event. Entrants should therefore expect the Organiser to consider that if an image looks like a Nature image, then it will be treated as a Nature image, even if the entry suggests excessive manipulation. Entrants should plan their entries accordingly.

It is not desirable to have an Image excluded at short notice, before or after judging, when there is no facility for discussion. In a Nature Event or Category, the Judges should assume that any Image presented to them does meet the PAGB Nature definition.

After judging, the Organiser has discretion to review eligibility, including calling for the original file of the image, and this is likely for any awards.

- **Creative:**

Our accepted definition of 'Creative' is '*Altered Reality*'.

The image must obviously display a change in natural colour, form, shape, or any combination of these three. Creative images are often montages (a

blending or composite of multiple images). If camera could not have captured the scene presented (e.g. because the scene never existed' such as with most montages), then it is considered to be 'Altered Reality'.

High Dynamic Range (HDR) images without further changes are not considered '*Altered Reality*'.

The original image(s) must have been captured using the photographic process. Images may not incorporate elements produced by anyone else.

Artwork or computer graphics generated by the entrant may be incorporated, provided that the original photographic content predominates: images may not be constructed entirely within a computer. It is necessary that the image's core content be identifiable.

Non-creative images are not eligible for this Class. Any subject matter is acceptable as long as the 'Altered Reality' guidelines are followed.

Creative images entered in this Class may be colour or monochrome.

- **Scapes:**

This Class encompasses Landscapes, Seascapes, Waterscapes, Skyscapes, and/or Cityscapes or any scenic view where the main subject-matter is the view. People may be included in the scene as long as they are ancillary and or supportive of the main subject.

Images entered in the Scapes Class may be colour or monochrome, including Infra-red and or HDR images.

- **Monochrome:**

Only monochrome images which do not fit into the Creative or Scapes Classes should be entered into the Monochrome Class.

A black and white image going from very dark grey (black) to very clear grey (white) and containing only various shades of grey.

A 'black and white' work toned entirely in a single colour remains eligible for the Monochrome Class. However, a 'black and white' work modified by partial toning or by the addition of one or more colours (e.g. a colour splash), becomes a colour work and is thus ineligible for the Monochrome Class.

- **Open Colour:**

Any colour image which does not fall into one of the above Classes.

Entrants should note that 'Altered Reality' images are not eligible for the Open Colour Class (please refer to the Creative Class).

- **Mobile Phone:**

To be eligible, a 'Mobile Phone' image must be taken on a device whose main purpose is to conduct telephone communications but which also has a factory-fitted integrated camera.

Images taken on hybrid DSLRs or 'system' cameras with interchangeable lenses and which have an auxiliary telephone or which uses wifi or a telephone attachment to take an image remotely (e.g. via an 'app' on a phone) are not eligible in this Class. However, images taken on a mobile phone fitted with a 'clip-on' additional lens are eligible.

Images entered into the Mobile Phone Class may be colour or monochrome and may be of any subject (including Nature, Scapes and Creative).

While Mobile Phone images must be taken on a Mobile Phone they may be processed either on a Mobile Phone or on a separate computer.

In addition to the general requirement to be able to supply the original image, Award winners must additionally be willing to declare to the Organisers, if requested, the make and model of the device used to take the original image.

If entrants wish they may, in lieu of entering in the Mobile Phone Class, enter an image taken on a Mobile Phone in any of the other Classes above where the image meets that Class's criteria. However, that image (or a similar image) cannot then also be entered into the Mobile Phone Class.

We are relying on the honesty and integrity of the photographer not to submit images taken on anything other than a Mobile Phone.

Guidance Note:

Entrants are advised they might be disadvantaged if they submit a Mobile Phone image substantially smaller than the 1400 by 1050 pixels image size. Please refer to the Image Preparation guidance.

Please ensure you understand the definitions and take care to submit your photographs into the appropriate Class. Images which are ineligible for the Class in which they have been entered, or which would be a significantly better fit in an alternative Class, may be marked down at the selectors' discretion, or disqualified.

Image Preparation Guidance

- The images will be projected using a colour-calibrated high quality digital projector which has a displayable image area of 1400 pixels wide by 1050 pixels high.

- Images which are smaller than 1400 by 1050 pixels will be displayed as is (i.e. they will not be made any bigger) and will be surrounded by black as required to fill the displayable area when presented for selection.
- The online submission web site will not allow you to enter an image which exceeds either 1400 pixels wide or 1050 pixels high.
- Only JPG images will be accepted.
- An sRGB colourspace will be assumed. It is strongly recommended that submitted images should have been converted to the sRGB colourspace, otherwise the Selector will probably not see the same colours that you do!
- Please note that each image file to be uploaded must be no larger than 3 Mb.
- Please Read the Section on File Naming

Image File and Image Title naming requirements

- Image files submitted using the online submission website may have any file name, within reason, with the proviso that the file must be a valid JPG file with the file name suffix '.jpg'.
- Image Titles are restricted to 35 characters including spaces.
- Certain punctuation characters are not permitted within Image Titles. These are: _ # & / : ; * " ~ < > | ? \
- Please ensure you do not include your name in the Image Title – any images with the Author's name in the Title will be disqualified from the selection.
- Please use 'Title Capitalisation' in the Image Titles.
- The website will attempt to convert your file name into a preliminary image title. You may then modify that title to suit your requirements both before uploading the image and, if necessary or desired, after the upload. Please note that if amended after the original submission, the entry **MUST THEN BE REFINALISED**, otherwise submission is not made.
- Image titles will be available to the Selectors upon request, but may not be displayed as a matter of course.
- Although the Organisers may use reasonable endeavours to amend what they believe are obvious errors, if spotted, if your title has an error it may appear in both in the catalogue and on the results web pages as you have submitted it - do please check your spelling!

Submitting Entries

- Entries must be submitted using the Exhibition online entry pages via the Frome Wessex Camera Club website, whose home page is at www.fromewessexcameraclub.com. This is the only accepted method of entry.
